

OCF Softboxes

A Soft and Flattering Light

OCF Softboxes are softboxes tailor-made for fast and easy on-location photography. Like any other softbox, OCF Softboxes create a soft and flattering light. But unlike any other softbox, they are made in a unique material that is both lightweight and easy to fold and unfold. Add to that the fixed diffuser, the patent-pending speeding and the color-coded rods. Put all that together, and you have a softbox that is faster and easier to set up than any other on the market. There are four OCF Softboxes to choose from, each with a unique size and shape: strip, square, rectangular and octagonal. All four can be equipped with a Softgrid for even more precise light shaping.
